# Connecting your Android device to eduroam

These instructions are for connecting your Android device to the eduroam wifi for the first time. This can be done by connecting to the StrathWifiSetup network available in the Library and Student Residences. Once you configure your device to connect to eduroam, you will connect automatically afterwards. By configuring your device, you will not only be able to ensure your Android device connects to eduroam here at Strathclyde, but this will ensure your device will be configured to connect to eduroam on any campus you travel to.
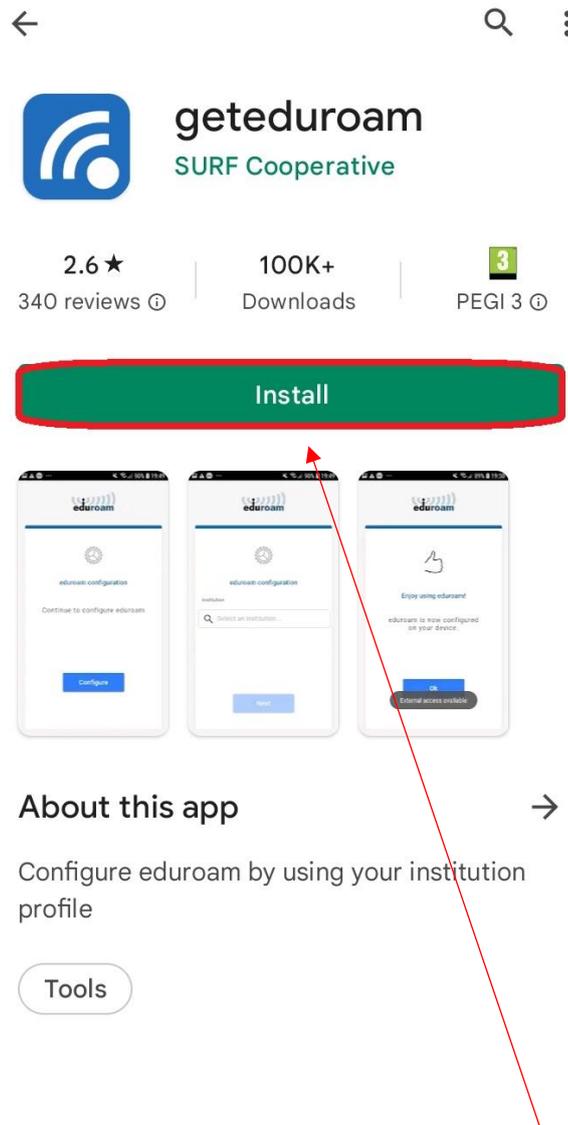

1. Select Settings

2. Select Connections.
